Packing List

- VILTA

- Portable Bag

- Charging Cable

- Lanyard

- User Manual

Product Overview

App Installation

- Download App on Freevision's official website www.freevisiontech.com.
- For iOS user, search "FV Share" in App Store.

- For Android user, search "FV Share" in Google Play or scan below QR Code

- Android 4.3 above or iOS 9.0 above required.

Smartphone Installation & Balance

- VILTA won't work unless mounting the phone. Smartphone detection can be closed in App.
- Always keep your phone well balanced in level prior to power on, or it will greatly affect working performance.

01 Smartphone Installation

- 1 Pull open the smartphone mounting clip.
- 2 Put your phone in and keep it close to the tilt axis motor.

Please ensure back camera of phone is outward and not covered.

02 Smartphone Balance

1. Unscrew the balance adjustment knob.
2. Slightly move the adjustment arm.

3. When your phone can stay level and balanced, screw up the balance adjustment knob.

Write scale of adjustment arm for easy reuse.

03 Power On/Off

- 1 Long press power button for 3 seconds to power on/off.

If system halted, long press power button for 7.5 seconds to mandatory shutdown.

App Connection

- Turn on bluetooth and unlock the phone screen rotation. Ensure phone can be displayed horizontally.
- Open App, tap Connect to enter the device list. Choose your gimbal to connect.
- The light of shutter button will go out after successfully connected.

IC WARNING

ISED RSS warning

This device complies with Industry Canada licence-exempt RSS standard (s). Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

ISED DC Radiation Exposure Statement:

This equipment complies with ISED DC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet appareil est

conforme aux limites d'exposition de rayonnement RF ISED DC établies pour un environnement non contrôlé.

Cet émetteur ne doit pas être co-implanté ou fonctionner en conjonction avec toute autre antenne ou transmetteur.

FCC WARNING

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
